

Appendix 1

CCAC COVID-19 Self-Screening Questionnaire

All CCAC students, employees, contractors, visitors and guests are required to review the CCAC Self-Screening Questionnaire prior to entering CCAC buildings and facilities. Coming to a CCAC campus or facility sick or with symptoms puts the entire campus community at an unnecessary risk for spreading the novel coronavirus, the virus that causes COVID-19. By working together, we can maintain a healthy environment for all.

Individuals who answer “yes” to any of the questions on the self-screening questionnaire, or who otherwise feel sick or suspect that they may have been exposed to COVID-19 are not permitted to come to campus and will be sent home if on campus. Anyone with symptoms of COVID-19, even mild ones such as a sore throat, should get tested. If a test result is positive, individuals must then self-isolate for 10 days after the date the swab was collected and if they continue to have symptoms, for additional time until there is at least one symptom free day before being released. If you are sick with symptoms of COVID-19 and have had a negative test, you should continue to isolate for at least 10 days until after you first started to experience symptoms or one day after your symptoms resolved, whichever is longer. It is important to check with your doctor to see if further testing is appropriate.

All CCAC students, employees, contractors, visitors and guests are required to answer the following questions honestly:

Individuals should only come to a campus/facility if they have answered “no” to every question.

- Do you have a temperature at or above 100.4° or any reason to be concerned that you are developing a temperature (without having taken a fever-reducing medicine)?
- Have you experienced a new cough that you cannot attribute to another health condition?
- Have you experienced new shortness of breath that you cannot attribute to another health condition?
- Have you experienced a new sore throat that you cannot attribute to another health condition?
- Have you experienced new muscle aches that you cannot attribute to another health condition or a specific activity such as physical exercise?
- Have you had any of the following additional symptoms in combination with the above: chills, repeated shaking with chills, runny nose or new sinus congestion, fatigue, new GI symptoms, new loss of taste or smell?
- Within the last 14 days, have you had close contact with someone who is currently sick with suspected or confirmed COVID-19? (Note: the CDC defines [close contact](#) as being within 6 feet of an infected person, with or without a face covering, for at least 15 minutes.)
- Within the last 14 days, have you traveled internationally or to an area with increasing cases that has been deemed a Coronavirus hotspot? If viewing electronically, click [HERE](#) to check.

If you cannot confidently answer “no” to these questions, do not come to campus. By coming to work/campus, you are attesting that you confidently answered “no” to the above questions and have a very low risk of carrying or spreading COVID-19. Students who cannot answer “no” to the above questions should advise their Dean of Students to discuss options. Employees who cannot answer “no” to the above questions should contact Human Resources to discuss options.

Any individual who exhibits symptoms commonly associated with COVID-19, or who otherwise provides information to college personnel that indicates he or she may have been exposed to or contracted COVID-19, will be directed to leave the premises and not return until they have self-isolated for 10 days and have had at least one symptom free day before being released.

If your symptoms are severe, you may need to contact your medical provider.
