All CCAC students, employees, contractors, visitors and guests are required to review the CCAC Self-Screening Questionnaire and conduct symptom monitoring every day before entering CCAC buildings and facilities. Individuals who answer “yes” to any of the questions on the self-screening questionnaire, or who otherwise feel sick or suspect that they may have been exposed to COVID-19 should stay home and are not permitted to come to campus and are to complete the COVID-19 reporting form. All CCAC students, employees, contractors, visitors and guests are required to answer the following questions honestly:

**Individuals should only come to a campus/facility if they have answered “no” to every question.**

- Within the last 14 days, have you had close contact (please reference pages 3) with someone who is currently sick with suspected or confirmed COVID-19?
- Have you returned from travel outside of Pennsylvania or to areas within Pennsylvania that are experiencing a spike or surge in cases of COVID-19?
- Do you have a temperature at or above 100.4° or any reason to be concerned that you are developing a temperature (without having taken a fever-reducing medicine)?
- Have you experienced a new cough that you cannot attribute to another health condition?
- Have you experienced new shortness of breath that you cannot attribute to another health condition?
- Have you experienced a new sore throat that you cannot attribute to another health condition?
- Have you experienced new muscle aches that you cannot attribute to another health condition or specific activity such as physical exercise?
- Have you had any of the following additional symptoms in combination with the above, that you cannot attribute to another health condition or specific activity: chills, repeated shaking with chills, runny nose or new sinus congestion, fatigue, new GI symptoms, new loss of taste or smell?

Symptoms and guidance are changing often, review the most current guidance from the CDC to check your symptoms at: [https://www.cdc.gov/coronavirus/2019-ncov/index.html](https://www.cdc.gov/coronavirus/2019-ncov/index.html)

**If your symptoms are severe, you may need to contact your medical provider.**

If you cannot confidently answer “no” to the above questions, do not come to campus. By coming to class/work/campus, you are attesting that you confidently answered “no” to the above questions and have a very low risk of carrying or spreading COVID–19.

**STUDENTS** who cannot answer “no” to the above questions should advise their **Dean of Students** to discuss options.

**EMPLOYEES** who cannot answer “no” to the above questions should contact the **Office of Human Resources** to discuss options.
ANY INDIVIDUAL, regardless of vaccination status, who becomes sick while in class or clinical or while working, should notify their instructor/supervisor and return home or seek medical advice immediately.

ANY INDIVIDUAL, regardless of vaccination status, who while on CCAC’s premises, exhibits symptoms commonly associated with COVID-19, or who otherwise provides information to College personnel which indicates that that individual may have been exposed to or contracted COVID-19, will be directed to leave the premises and not return until their symptoms have resolved, they have received a negative diagnostic test for COVID-19, and/or they have received clearance from a health care provider that they are not at risk of transmitting COVID-19 to others.

Proof that the individual is fully vaccinated* against COVID-19 may also be provided, in lieu of a negative test, period of self-quarantine or other medical clearance, prior to a return to on campus work assignments, classes or other on campus activities.

*For purposes of this regulation, individuals will be considered fully vaccinated two (2) weeks after receiving the second dose of a 2-dose vaccine, such as the Pfizer or Moderna vaccines, or two (2) weeks after receiving a single-dose vaccine, such as Johnson & Johnson’s Janssen vaccine. The term “unvaccinated individuals” refers to any individual who does not meet the foregoing definition of “fully vaccinated.”

Current CDC Guidance: Recommendations for Fully Vaccinated People.

The CDC’s updated guidance is intended for the community and does NOT apply to healthcare or congregate settings. Healthcare settings should follow PA-HAN-526 or its successor for treating patients and residents exposed to COVID-19. Healthcare staff exposed to COVID-19 while working in a healthcare setting should follow PA-HAN-510 or its successor.

TRAVEL - Individuals returning from travel outside of Pennsylvania or to areas within Pennsylvania that are experiencing a spike or surge in cases of COVID-19 may be subject to a period of self-quarantine and/or required to provide proof of a negative viral test for COVID-19 prior to returning to on campus work assignments, classes or other on campus activities. Quarantine and/or testing requirements will follow CDC and state and local health department recommendations as then in effect.

**Individuals returning from travel outside of the United States, including individuals who are fully vaccinated, will not be permitted to return to on campus work assignments, classes or other on campus activities until they have completed applicable testing and/or self-quarantine periods recommended by the CDC and state and local health department guidelines, as then in effect. Additional information concerning current CDC guidelines regarding domestic and international travel are located on the CDC website at:

DETERMINING CLOSE CONTACTS OF PERSONS WITH COVID-19

- Transmission is most commonly spread when two people are in close contact with one another (within 6 feet, or 2 arm lengths).
- The nature and duration of contact also need to be considered when assessing close contacts. In general, time periods of 15 minutes or more appear to present the greatest risk.

TESTING - If you are worried about exposure or have begun feeling symptoms, get tested.
Free testing locations can be found by using this tool. Please use a local address when registering for a test. A community-based testing site has been established in McKeesport at RIDC Park (455 Industry Road, McKeesport, PA 15132) operational on September 15, 2020. For more information: https://www.alleghenycounty.us/Health-Department/Resources/COVID-19/Mckeesport-Testing-Site.aspx

Allegheny County COVID-19 HOTLINE: 888-856-2774
The Allegheny County Health Department (ACHD) has partnered with United Way 2-1-1 to offer a 24/7 hotline to address questions and concerns about COVID-19. Language services are available.

According to the CDC, vaccination is the leading prevention strategy to protect individuals from COVID-19 disease. The College therefore strongly encourages all students, faculty, staff and partners to get one of the COVID-19 vaccines authorized for use in the United States prior to returning to on-campus classes, work or activities. The College has and will continue to provide opportunities for all members of the College community to obtain the vaccine, at no cost, through both on-campus clinics and off-campus providers through the 2021-22 academic year. In addition, participation in certain athletic and extracurricular activities where masking and physical distancing are not possible may be made contingent upon each participant providing proof of vaccination.
